PRECAUTIONS FOR PRESET COOKING / REHEATING

Precautions for Preset Cooking / Reheating

1 In Case of Preset Cooking

- ▶ If the rice is old and dry, the results may be poor.
- ▶ If the rice is undercooked, add water up to half the scale to improve the result.
- ▶ A longer preset time may increase the chance of rice melanoidin (browning).
- ▶ Rinsed rice contains residual starch, which may cause burning during preset timer cooking.
- To reduce scorching, rinse the rice thoroughly in running water or decrease the cooking quantity.

2 In Case of Preset Reheating

- ▶ Leaving cooked rice at room temperature for extended periods can cause moisture to evaporate. In such cases, reheating may dry out the rice or cause slight browning (melanoidin).
- ▶ If the pot contains a large amount of rice, it may not reheat evenly.
It is recommended to reheat portions no larger than for three people (about half of the inner pot).
- ▶ Reheating cold or frozen rice may result in uneven heating, dryness, or partial burning.
- ▶ Before reheating cold-stored rice, place it in the pot, loosen it with a scoop, and then start reheating.
- ▶ Frozen rice should be fully thawed before using the reheating function.

3 Changing the Preset Time

- ▶ To change the preset time, press and hold the CANCEL button for more than 0.3 seconds, then restart the process.

4 If the Preset Time Is Outside the Available Range

- ▶ If the preset time is shorter than the cooking duration, cooking will start immediately.
- ▶ If the reheating preset time is shorter than the minimum required (100 minutes), reheating will start immediately.

5 If the Preset Time Exceeds 13 Hours

- ▶ “13H” will be displayed, and the preset time will automatically be limited to 13 hours.
Example: If you set the finish time to 7:00 AM the next day, but it's 5:00 PM on the current day (preset time = 14 hours), the system will display “13H” and reset the time to 6:00 AM.
(Maximum allowable preset time is 13 hours.)

Additional Notes:

- If the preset time exceeds 13 hours, it may result in spoilage or a bad odor.
- The 13-hour limit helps prevent rice from spoiling, especially during hot weather.
- Use the Preset Cooking function for finish times between 1 and 13 hours.
- Use the Preset Reheating function when your finish time falls between 100 minutes and 13 hours.
- Press the START button during preset cooking to check the current time; it will be displayed for 2 seconds.
